

Hi Herb,

I received the new CD about two weeks ago. I have since played it again and again, once or twice a day as I have time. I now am to the point where I can play all 20 songs without looking at the tab. Of course, I can't get through all 20 songs without making a few mistakes, but the mistakes keep getting less and less. I have also, at long last, learned to play "Remington Ride". I had so much trouble with it before when I only had the tab.

In short, the new Herb Remington CD has taken my playing to a new level. I seldom play anywhere outside my bedroom and it is nice to have a recording I can play along with to develop my timing. I have seen a lot of players who can play great solos all by themselves, but you put them in a group and they can't play in the proper timing.

I am looking forward to seeing the next CD come out, hopefully in a few months or so. I would love to have the rhythm tracks to songs like "Maiden's Prayer", "Sweet Talk", "White Christmas", and some of the Hawaiian tunes from the Tuff Fun Tab 2."
